

ReliaQuest for Microsoft 365 E5

ReliaQuest GreyMatter provides you with a unified view of Microsoft 365 E5 and non-Microsoft security tools. Pair that with a team of dedicated ReliaQuest security experts and you force-multiply your security operations.

Boost the power of your Microsoft 365 E5 security tools with ReliaQuest

Whether you're already all-in on the Microsoft 365 E5 security suite or just starting out, ReliaQuest GreyMatter provides automated, bi-directional integration across Microsoft and non-Microsoft security tools. GreyMatter can ingest data no matter where it lives, whether on-premises or in multiple clouds, to correlate events so you can respond quickly to threats.

It provides singular visibility across the entire enterprise ecosystem, unifying detection, investigation, and response. Drive security effectiveness and cyber resilience with GreyMatter while integrating Microsoft 365 E5 security products at the pace that best suits your organization.

Benefits:

- Proactively respond to threats via GreyMatter through powerful API integrations with your existing security tools
- Model the business impact of adding new Microsoft 365 E5 security tools to your environment so you can integrate the products that best suit your organization
- Utilize the Microsoft 365 E5 security tools where it makes sense without adding more "swivel chair" security for your analysts
- Get unparalleled visibility across your security infrastructure with bi-directional integration across any vendor solution, whether on-prem or in one or more clouds
- Gain real-time situational awareness with continuous monitoring of all Microsoft and non-Microsoft security, cloud, and productivity tools
- Improve security posture with actionable metrics and coverage maps to industry-standard frameworks
- Streamline, unify, and automate security operations processes to reduce MTTR from hours to minutes

GreyMatter brings together telemetry from Microsoft and non-Microsoft security solutions to deliver singular visibility across the entire enterprise ecosystem.

Key Capabilities

Singular visibility across your Microsoft and non-Microsoft environments: ReliaQuest GreyMatter, built on an Open XDR architecture, provides bi-directional integration across all security tools, whether on-prem or in one or more clouds, to ingest data and automate actions.

Comprehensive threat protection and response: ReliaQuest GreyMatter centralizes alerts, reduces false positives, and drives fast response to help you stay ahead of the evolving threat landscape.

Round-the-clock monitoring: Leveraging its cloud-native GreyMatter platform, ReliaQuest offers continuous monitoring of all Microsoft and non-Microsoft resources, applications, and security tools for real-time situational awareness.

Field-tested detection content packages: Stay ahead of threats and reduce the impact of events with over 600 detection rules curated for Microsoft and/or mixed-vendor environments, plus continuous updates based on non-stop research and learning from across a growing customer environment.

Drive efficiencies across each stage of the security lifecycle: Leverage automated data collection, investigation, and response playbooks to take fast action and reduce MTTR from hours to minutes.

Managed integrations: We continuously optimize your security tools so you can leverage their latest capabilities and extend returns on your security investments.

MITRE ATT&CK framework mapping: Mapping to MITRE ATT&CK framework and Kill Chain stages help plot coverage and uncover areas of focus to improve security posture.

Industry peer benchmarking: Know how you are doing against your peers when it comes to visibility, team performance, and tool fidelity.

What our customers say about ReliaQuest GreyMatter

"Security is complex. The GreyMatter platform makes security simple for advanced threat analysts and new analysts alike." - **Gopal Padinjaruveetil, CISO, Auto Club Group**

"We don't have the internal staff to be able to meet the challenges of today's threat landscape. The GreyMatter platform allows us to automate workflows between our SIEM and EDR, giving us much-needed breathing room, especially during on-call rotations." - **Lead Cyber Security Engineer, \$6.4B Global Manufacturing Company**

"For years, vendors have promised to deliver a 'single pane of glass,' but always fell short. ReliaQuest GreyMatter unifies security tools for visibility across layers, aggregated alerting, and faster investigation and response, bolstered by proactive threat hunting and attack simulation to continually improve your posture, all wrapped with security advisory expertise for accelerating key initiatives." - **John Childers, Director of Information Security, Aqua America**

"ReliaQuest's vendor-agnostic Open XDR approach also helps us ensure we're maximizing the capabilities of our existing toolset by centralizing and normalizing our data, ultimately enabling my team to manage risk more efficiently and effectively." - **Robert Vazquez, CISO, Independent Purchasing Cooperative (IPC)**

"GreyMatter cuts investigation time in half. From the GreyMatter UI, I have all the aggregated research and context I need to investigate and respond to threats. It's saving me the pain of navigating and searching across multiple tools." - **Security Analyst, Global Restaurant Group**
