

CUT THROUGH THE NOISE OF MANAGED SECURITY SERVICES

Many security teams struggle to protect and enable their businesses with inadequate in-house resources. While managed security services (MSS) and/or managed detection and response (MDR) providers can offer support, determining the right solution is no easy feat. The good news? ReliaQuest can help you cut through the confusion and achieve successful security outcomes.

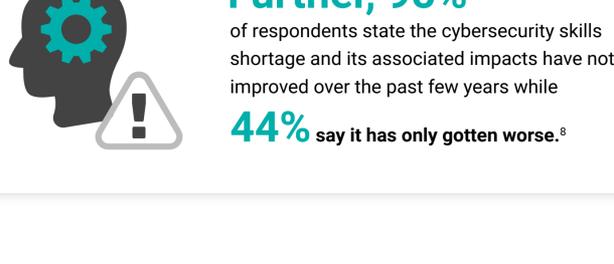

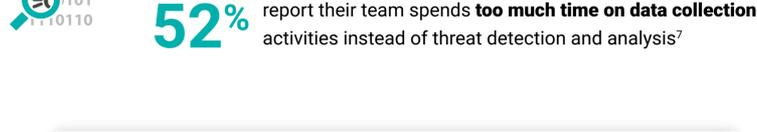

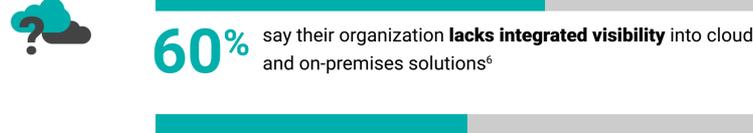

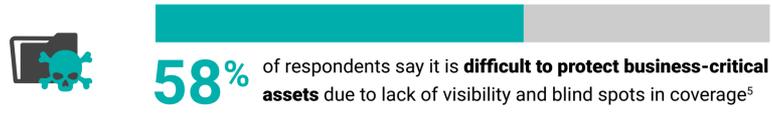

THE THREAT LANDSCAPE IS RELENTLESS

BUT MANY COMPANIES ARE NOT PREPARED

Many employees express concerns with their organization's current approach to threat detection and analysis:

THIRD PARTIES CAN HELP – BUT BUYER BEWARE

Organizations are outsourcing a myriad of operational cybersecurity activities. Many are turning to MSS and/or MDR vendors – but they're not all equal.

- Some MSS providers only perform logging and monitoring
- Some MSS providers perform both the logging and monitoring *and* manage security solutions
- Some MSS providers offer comprehensive MDR either as a separate service or in addition to traditional managed security service providers.

What's more, many MSS and MDR providers may lack critical attributes, such as:

RELIAQUEST CUTS THROUGH THE NOISE TO HELP DELIVER SUCCESSFUL SECURITY OUTCOMES

For security teams who are looking to outsource cybersecurity due to lack of talent or resources, ReliaQuest delivers successful security outcomes by force multiplying an organization's security operations teams.

ReliaQuest combines the power of technology automation and security expertise to make security possible for organizations by:

- Increasing visibility
- Reducing complexity
- Managing risk
